

Working with Mealworms

Targets:

- To read and understand specific information in scientific literature.
- To learn specific scientific vocabular regarding *classification, location, characteristics, habitat, diet, behaviour, and life cycle*.
- To research and conclude.
- To present ones findings – orally and with a Power Point presentation.
- To draw and use imagination.
- To have fun while learning and speaking English.

Assignment:

1. **Darkling Beetle-text:** Read and understand the text and find all the facts about the life of the Darkling Beetle – from larvae to beetle. Put all the facts into a Power Point-presentation, which must contain general information on insects and their special trademarks, specific information on beetles and specifically Darkling Beetles, pictures, drawings, explanations in your own words, facts etc.
2. **Draw your own imaginary Beetle:** With inspiration from the booklet, draw and create your own beetle and present it in a creative and scientific kind of way.
